About New Jersey Rett

Syndrome Association (NJRSA)

NJRSA is a NJ 501(C)3 organization established to contribute towards an improved quality of life for girls and women affected by Rett syndrome. We have established a network of Rett syndrome specialists serving the New Jersey tri-state area and are working with UMDNJ to establish a permanent Rett syndrome clinic in NJ. By raising awareness, we foster public attitudes conducive to early diagnosis, treatment, support and research of Rett

About Rett Syndrome

Children with Rett Syndrome appear to develop "normally" for the first six to eighteen months after birth, then enter into a degenerative stage of the disease. The child rapidly begins to lose their speech; parents will never again hear the words mommy or daddy from their daughters. Instead the ability to communicate verbally is replaced with the use of their beautiful penetrating eyes. Many children that once were able to crawl or walk find themselves unable to perform these functions. Purposeful hand use is lost as well and replaced with repetitive movements; the girls can no longer feed themselves or even hold onto their favorite toy. Additional symptoms that define the syndrome include; digestive difficulties, breathing abnormalities, seizures and severe scoliosis. It is a life of pain, frustration, and total dependence. Rett syndrome occurs spontaneously in approximately 1 in every 10,000 female births. There is no cure...yet. Due to recent discoveries, many scientists who study the gene involved in RTT and its protein have become convinced that understanding RTT will unlock answers to many other neurological conditions such as autism, bipolar disorder. It is now reasonable to expect some improvements for nearly all, which will significantly enrich their lives.

Your help is our hope . Thank you!

About New Jersey Rett Syndrome Association (NJRSA)

NJRSA is a not-for-profit organization that dedicated to improving the quality of life for girls and women with Rett syndrome. Your gift will help support our NJ Rett Syndrome Center and fund the important research to find a treatment and cure for

Rett syndrome.
