**MARK
CHARAMELLA
MEMORIAL GOLF
OUTING AND
DINNER**
May 21, 2012

Mark was a devoted husband, father and friend that touched many lives through his enthusiasm and love of life. Every job, school or team organization that he was involved with became a part of him. He had a great ability to connect with people and share his passion for life with everyone that he met. As a father of a daughter with Rett syndrome, Mark did everything he could to make her life better. It is in his honor that we gather his family and friends to celebrate a life well lead and to give to a cause that was close to Mark's heart.

Rett syndrome is a unique developmental disorder affecting cognitive, sensory, emotional, motor and autonomic function found most commonly in girls. Symptoms usually appear within 6-18 months, when there appears to be a slowing of skill acquisition followed by a period of regression. Rett syndrome presents itself differently in each individual. The International Rett Syndrome Foundation (IRSF) aims to fund research for treatments and a cure for Rett syndrome while enhancing the lives of those living with Rett syndrome by providing information, programs and services.

Please help us to continue Mark's efforts to support promising research into treatments and ultimately a cure for this devastating disease. Thank you for your support!
