REVERSAL OF SYMPTOMS IN AN AUTISM SPECTRUM DISORDER

Rett Syndrome is reversed in genetic mouse model

Dr. Bird Discusses Key Points of the Experiment (Flash - approx. 9 minutes)

{flv}Bird_sound_bites{/flv}

Families Comment on the Experiment (Flash - approx. 3 minutes, 22 seconds)

{flv}RSRF_Families_b_roll{/flv}

Rett Mouse Before Reversal (Flash - approx. 1 minute)

{flv}mouse_before{/flv}

Adult mouse (12 weeks old) with full blown symptoms. Note low stance, inertia, tremor, arrhythmic breathing, splayed hind limb position and moderate hind limb clasping when picked up by tail.

Rett Mouse After Reversal (Flash - approx. 1 minute)

{flv}mouse_after{/flv}

Same mouse 4 weeks later.

THE HERO'S PATH

A special message from Julia Roberts.
